1 Week Training Course (40 hrs)

This 1-week course contains a brief but challenging training program in accordance to the training recommendations for Flight Operations Officers as laid down in ICAO doc. 7192-AN/857 Part D-3 and the requirements established by IOSA standards.

In order to capture above mentioned requirements and recommendations ASISTIM set up a moduled recurrent training solution that will cover the complete syllabus within the requested three years. The degree of expertise for this course will be tailored to the needs of airline staff working in operations control and is derived from the daily experience in our own Dispatch Center.

Training Materials

The costs of the training materials are included in the tuition fee. They are part of the Jeppesen® ATPL training volumes and benefit from high quality content and layout. Materials used during the course stay with the students as reference documents for them to take home or keep at work

Course Targets

Successful completion of this course will allow the participant to directly contribute to the safety and reliability of flight operations, and make a positive contribution to the economy and efficiency of aircraft operations. The acquired skills will improve the applicants ability to analyze and evaluate operational problems, thereby improving their judgment and decision making skills.

Certificate

All students earn a certificate after completion of the course and passing the exam by more than 75%. The certificate confirms that the recipient has successfully completed the attended courses and also displays the training content as well as the total classroom hours.
